ABOUT ARUNACHAL PRADESH

Arunachal Pradesh attained its statehood on 20th February 1987. It is situated in the North-Eastern part of India with 83743 sq. kms area and has a long international border with Bhutan to the west (160 km), China to the north and north-east (1,080 km) and Myanmar to the east (440 km). It stretches from snow-capped mountains in the north to the plains of Brahmaputra valley in the south. Arunachal is the largest state area-wise in the north-east region, even larger than Assam which is the most populous. It is situated between latitude 26° 30' N and 29° 30' N and longitude 91° 30' E and 97° 30' E. Itanagar is the capital of Arunachal Pradesh and located at an altitude of 530 meters above

MSL. It is named after Itafort meaning fort of bricks built in 14th century A.D. The widely scattered archeological remains at different places in Arunachal bears testimony to its rich cultural heritage. Arunachal Pradesh, a serene land tucked into the North Eastern tip of India, invites you to relax in its picturesque hills and Valleys, enjoy its salubrious climate and meet its simple and hospitable people, with their glorious heritage of arts and crafts and colorful festivals that reflect their ancient faith in the inexorable power of nature. The state provides abundant scope for angling, boating, rafting, trekking and hiking. Besides, there are a number of wild life sanctuaries and national parks where rare animals, birds and plants will

fascinate the visitor. Nature has provided the people with a deep sense of beauty which finds delightful expression in their songs, dances and crafts. The climate varies from hot and humid to heavy rainfall. It becomes progressively cold as one moves northwards to higher altitudes. Trees of great size, plentiful climbers and abundance of cane and bamboo make Arunachal evergreen. Arunachal Pradesh is considered to be the nature's treasure trove and home to orchids, known for their exquisitely beautiful blooms, from one of the dominant taxa with more than six hundred species, occurring in varying elevations and climatic conditions throughout the state.
